

ENHANCEMENTS COMING SOON

FOR THE

**ALABAMA CAREER
PLANNING SYSTEM**

Since 2010, the Alabama Career Planning System (ACPS), powered by Kuder®, has been the online resource of choice for students in Alabama to learn about themselves, explore career options, plan for education, and prepare for the world of work. At the same time, it has served as a valuable tool for educators who use the system to monitor progress, plan curriculum, and support career guidance initiatives.

Together, the Alabama State Department of Education and Kuder are excited to announce that we're upgrading the system in June to feature latest (and, we think greatest) version of Kuder Navigator®, redesigned to help your students visualize their futures — and make the plans to get there.

Below is a just a sampling of system enhancements that will be available June 29, following a short blackout period.

- Fresh design and a new responsive interface allowing for easy use from any device – laptop, desktop, tablet, and phone!
- Expanded resources, including an updated graduation planning tool, improved career assessments, and enhanced resume builder and shareable portfolio.
- New tools such as Finance 101, an in-depth financial literacy module, and College Match, which helps students identify safety, match, and reach four-year colleges as well as understand true college costs and admissions likelihood.
- Language toggle for English and Spanish.
- Additional features for parents and guardians in their free accounts.

Preview the new Navigator [here](#).

No System Access/Blackout Period: June 22-28

From June 22-28, you, your students, and their parents won't be able to login into any accounts or access al.kuder.com due to the transfer of system data taking place. On June 29, the updated Alabama Career Planning System will be live, and logging in will be available using existing usernames and passwords.
